Biography

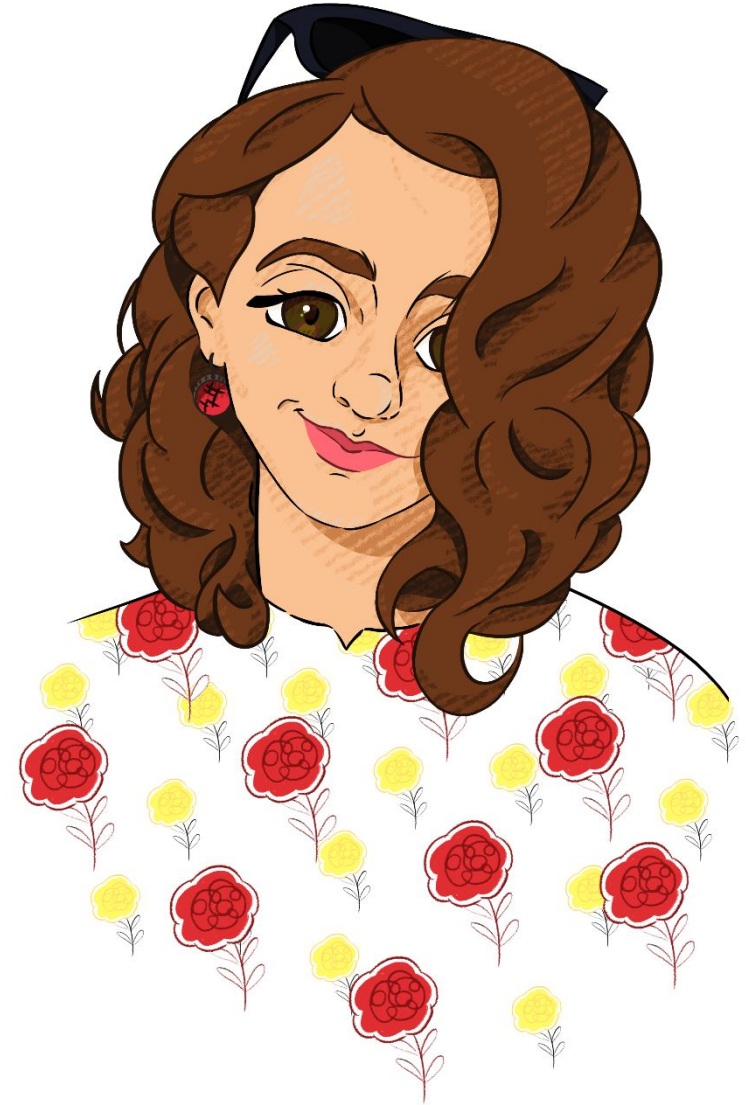

I have found in animation the ideal medium in which to experiment and develop my great passions: drawing and cinema. I think animation is an exceptional medium in which traditional techniques and new technologies work together to achieve exciting and inspiring projects.

At the moment I am working on "*Calaveres Animació*", a small 2D animation studio based in Valencia, where we carry out didactic series, video clips and short films. At the same time I bring off commissions as a freelance while I continue to learn independently.

If you want to see more of my work, please access my Website or my Instagram.
